EXPAND YOUR FLEET'S REACH AND BOOST YOUR REVENUE

We are thrilled to announce the official launch of our taxi app, GoPRIME, and we're offering an exciting opportunity for your fleet to join our platform. After months of dedicated development, we've worked on our system to help you effortlessly increase your revenue.

With the noticeable growth of Uber in our area, we believe it is our responsibility to support local resources. Uber will undoubtedly change Chamonix and the surrounding area, but we currently have an advantage by offering 8-passenger vehicles, not just the Uber X van. Uber operates with a 25% revenue scheme, works only with individual drivers, and, at the moment, does not offer the option to join as a fleet. As local transfer partners, you can take advantage of these unique benefits.

WHY JOIN OUR APP?

- **App is an answer:** First modern solution in the area that responds to current market challenges and helps in development of businesses.
- **Extra Revenue Opportunity:** When your rides are low, simply log in to the app to generate extra income. It's a win-win solution that addresses the same challenges we've worked hard to overcome.
- **Flexible and Customized:** Enjoy individualized, flexible pricing tailored to your fleet size, along with GPS tracking for both drivers and the admin panel. Set up your system with different vehicle types and pricing options. Currently, we are operating with 3 vehicle types : Premium (1-4 pax), Minivan (1-8 pax) & Luxury Minivan (1-6 pax), but it is up to you how you set your fleet up and what tariffs you use.
- **Comprehensive Reporting:** Access detailed reports to ensure complete transparency and valuable operational insights.
- **Global Reach:** Your clients and drivers can use the app in their preferred language, ensuring a seamless experience.
- **Marketing Power:** With a marketing value of €10,000, we are committed to bringing fresh business to our platform.
- **Training Included:** We provide full training for you and your drivers, including a demo meeting to walk you through every feature of the app.
